ANSWER **THREE** OF THE FOLLOWING QUESTIONS:

1. Discuss the influence of class inequality on health.
2. It is claimed that modern society is undergoing a process of medicalization. What evidence has been put forward to support this statement?
3. Discuss the demographic and epidemiological transitions. What do they tell us about changing patterns of disease.
4. How does gender inequality influence health care?
5. How are the concepts **status** and **role** used to "make sense of every day situations?"
6. The institution of the family is undergoing many changes in modern society. What are these changes, and do you think they are leading to "a breakdown" in the modern family?
7. What is meant by the term "sick role"? How well does it describe the medical control of health problems in society?
8. Discuss three of the five components of culture.
9. Discuss the process of socialisation over the life course.
10. Discuss aspects of health that are shaped by society?
