Professor John J Morrison

Mr Peter J Milton

Dr Geraldine Gaffney

*Time Allowed: 3 Hours*

*Attempt all questions*

*Please use separate answer books for each question*

1. A 24 year old woman has recently been diagnosed as having fetal anencephaly at 22 weeks gestation and is requesting advice about termination of pregnancy. Discuss the medical, ethical and legal issues pertaining to the advice you would give her.
2. Write short notes on each of the following:
  - (a) Cord prolapse
  - (b) The Bishop score
  - (c) Moderate dyskaryosis
  - (d) Chlamydial pelvic infection
3. Discuss the risks for pregnancy of increased maternal age.
4. Discuss the contraceptive measures that are available for a 30 year old woman who has had three normal pregnancies.
5. Describe the methods available for treating menorrhagia with specific reference to new methods of treatment.
