Instructions:

Attempt **Three** questions – **One** question from each section.
Use a separate **answer book** for each question. All questions
will be marked equally. Please note you are expected to
support your answer by referring to relevant literature.

Duration	<u>2hrs</u>
No. of Answer Books	<u>3</u>

Requirements:

Handout	<u> </u>
MCQ	<u> </u>
Statistical Tables	<u> </u>
Graph Paper	<u> </u>
Log Graph Paper	<u> </u>
Other Material	<u> </u>

No. of Pages	<u>1</u>
Department(s)	<u>Nursing</u>

Section A

1. Briefly outline the features of two contrasting approaches to patient care and discuss one organisational approach in detail.
2. Select a Nursing Model of your choice and discuss its potential for use in your nursing practice.

Section B

3. Outline the significant features of both the qualitative and quantitative approach to research in nursing. Discuss one of these approaches in detail.
4. Detail the benefits of the utilisation of research in nursing practice. Discuss the strategies you feel would increase the utilisation of research in psychiatric nursing care.

Section C

5. From a Multidisciplinary Approach to patient care identify four potential care needs of a patient diagnosed with Alzheimer's disease. Discuss how two of these needs can be met by using a nursing care plan.
6. Identify the strategies which could be used in nursing management to promote effective and efficient patient care.
